TIME & DURABILITY

are two of the keys to a successful rental business. no other rental system today offers this time and space saving unique performance. the careful selection of the best materials, specifically designed parts as well as numerous inhouse and on-snow tests assure that only the best items are selected for the interchanger models.

over the past years interchanger has proven to be the most functional, durable and cost-effective system on the market.

interchanger models are available as classic strap bindings and fastec speed entry – high performance bindings. all models are fully compatible with the IC disc which makes them easy and flexible in use.

combining interchanger and fastec technology is huge step for rental equipment. it gives rental customers unique comfort and performance advantages, which in turn reflects back on you and your business.

PRE-MOUNTED DISC

heart of the interchanger system is the 2-component disc, permanently mounted on your rental board. The binding itself is placed within seconds.

SERVICE RAMP

for your board service you do not have to dismount the interchanger disc. just use our service ramp - done! #75800

SPARE PARTS

interchanger offers a wide range of high quality spareparts - basic mountingscrews - special boltguards - fixing screws - buckles in several sizes - rental toe and anklestraps - toothstraps - universal discs ...
